CHANGE OF MOLECULAR SIZE DISTRIBUTION
DURING AGING OF ALKALI CELLULOSE OF VARIOUS PULPS. Rept. no. 2 of Studies on the Uniformity of Pulp and Rayon Samples. [1961] [13]p. 7 refs.
Order from SLA \$1.60 61-16575

Trans. of Kogyo Kagaku Zasshi (Japan) 1956, v. 59, no. 9, p. 1072-1074.

DESCRIPTORS: *Cellulose. Aging, *Wood pulp. Rayon fibers. Polymerization.

In the case of viscose method rayon, the degree-of-polymerization distribution of the rayon is influenced by the degree-of-polymerization distribution of the raw material pulp, and rayon with a uniform distribution is obtained from pulp whose degree of polymerization is uniform. Degree-of-polymerization distribution changes during aging of alkali cellulose were measured using three types of samples: linter, and wood pulps for tire (Materials--Textiles. TT, v. 6, no. 7) (over)
